

Energy Companion

Empowering large companies in Oil & Gas & Utilities to cut energy spending, optimize resources management for internal and external customers with tailor made data applications.

CONTEXT

Large companies in Oil & Gas and Energy distribution need to quickly create custom analytics applications, in order to optimize resource management for internal and external customers:

- Monetization of services beyond raw product
- Stronger customer proximity and better customer success
- Higher differentiation from competitors
- Significant decrease of operating expenses

CHALLENGE

- How to provide thousands of users with dedicated data analytics modules
- How to improve teams and customers operational efficiency

SOLUTION

ForePaaS has accomplished amazing results for companies in the Oil & Gas & Energy industry. The platform includes:

- Dashboarding tools to offer a consolidated view of inventory and consumption
- Automated integration of industry news feeds
- Implementation of calculation rules specific to the energy market
- Decision-making support on energy purchases
- Early detection of consumption anomalies and frauds
- Real-time monitoring of on-site consumption via IoT sensors
